

# VIDA

COMMERCIAL GROUP

## Leather bag and shoes

Vida Trading Company has divided its products into four main groups with hundreds of sub-categories. Vida produces diverse products in terms of design, color, size, etc. They are suitable for different tastes, and can easily be selected according to the customers' desire. The company's products are prepared by the use of high-quality raw material; therefore, Vida offers the best products to the customers. Vida Trading Company also ensures their health by fully observing all the hygienic factors.

## Product specifications

### Durability

One of the advantages of our bags and shoes are their durability. Leather products have a longer shelf-life compared to synthetic materials. High-quality Leather is more appropriate for harsh work environments, which means that these products will be more durable.

### Water proof

Water proof leather shoes are either refined or waxed. When working outdoors or in the kitchen, you should wear water proof footwear to keep your feet dry and prevent external damage to the shoes. This is one of the specifications of Vida leather shoes.

## Better fit

Leather shoes will take the shape of your feet after a while. However, other types of material such as plastic or synthetic shoes may be inflexible, and they can hurt your feet. Another specification of our shoes is that they are a better fit for you in terms of flexibility, comfort and convenience.

## Easy to clean

It is very easy to clean leather with a damp cloth. Because leather is breathable, it dries easily. For long-term storage of any leather product, you need to take care of them, and because leather is easy to clean, you will no longer have much trouble.

## Light weight

The products made in Vida Trading Company are made of first-class leather, which is why they are very light and stylish, and in general, it is considered as a luxurious and formal item.
